

A statement of interest to all "Shift Hunter" fans.

1. Every cent received from the Shift Hunters goes into the Shift Hunter Letters.
  2. Due to the intense interest the S.H. letters are six months behind in reporting major varieties that have been reported for this purpose.
  3. There reposes in the safe at Alton, enough of my own data to fill about two years of reports. Preference is given to data submitted from others.
  4. There is enough data, scattered thru old files of Philatelic publications to provide over five years of S.H. letters as reprints. Mr. Leo Shaughnessy has just presented the Shift Hunters with all his back files of journals for many years. Mr. Elliott Brandon has offered his services in carefully clipping the Plate Variety data from these magazines and these clippings are being carefully "pasted up" on "Master Copy" for the S.H. letters and filed for future publication. (Full credit is being given to all sources of clippings.)
- IT IS THE AIM OF THE SHIFT HUNTER LETTERS TO SOME DAY SHOW A COMPLETE FILE OF ALL U.S. PLATE VARIETY DATA.

#### A REQUEST:-

If you have files of old stamp papers or journals are you willing to clip them and send us any or all data that you would like to see reprinted into your Shift Hunter files? Be sure to leave good margins and to attach a slip to each clipping showing the name of the paper from which it was clipped.

Are you willing to send your files of old stamp papers to Mr. Elliott Brandon, West Middlesex, Penna.? If so please write to him giving a list of what ~~#####~~ you can supply. To avoid any duplication, he will reply with a request for those items that he needs. You may then send them, prepaid, to his address with the assurance that ultimately the data will be returned to you through the Shift Hunter Letters.

#### A SECOND REQUEST:-

The publication of the enormous amount of data that awaits our attention would be greatly hastened if we had double the number of supporters. Last season you received through the Shift Hunters more data than in any previous year. This was due to the ever increasing number of \$2.00 checks that came in. L.M. Ryer in the Western Stamp Collector and Richard Kindig in the Denver Post are widely advertising the Shift Hunters and sending sample S.H. Letters out on request. We cannot all write newspaper columns but we can quietly talk and write about them to our stamp friends.

#### A THIRD REQUEST:-

Every cent in the treasury has been expended for the last years reports. The FOURTH year begins with this issue of Sept. 1932. May we receive your \$2.00 for the fourth year at once, so that funds may be quickly available for the biggest year yet?

Cordially yours

G.W. Bedford.

# SHIFT HUNTER PUBLICATIONS

## The SHIFT HUNTER LETTERS

\$2.00 per year.

These letters, often spoken of as the "Shift Hunter Service", are beautifully illustrated Offset prints of U.S. Plate Varieties as reported by over 125 Shift Hunters.

Already the Shift Hunter files contain more plate variety data and illustrations than are to be found in any contemporary publication for the same period and it is the ambition of this group of cooperating collectors to make the Shift Hunter files practically complete in regard to all U.S. Plate Varieties, early or late.

This comprehensive program will require a number of years for its completion but is entirely possible due to the wholehearted cooperation that we have received for the past two years and which we are assured will continue.

Several EDUCATIONAL reports are made each year, for the purpose of bringing to all collectors a clear understanding of the methods of plate and stamp manufacture. With a knowledge of the "why and wherefore" a plate variety stamp has a story to tell and acquires additional interest.

Philatelic nomenclature is being sifted, improved and augmented by the Shift Hunters. Improper usage of Philatelic terms is being corrected, new terms are being coined. Many are learning to accurately differentiate between relief, plate, print and ink varieties. Thru the kindly assistance of Mr. A. W. Hall, Director of the Bureau of Engraving and Printing, several puzzling varieties have been explained. Theories are being replaced by facts. The Shift Hunters are doing real PHILATELIC RESEARCH.

The Shift Hunters have no officers and no dues. Correlation and dissemination of data is the object of this unorganized organization.

The Shift Hunter year begins and ends in September. The first years reports are no longer available. The second years reports are still available at \$2.00. The third year begins in September 1931 and those who have seen advance copies of some of the future reports agree that they are better than ever.

## PLATING of the 5¢-INLAND EXCHANGE.

Special Report. \$3.00

Thru the cooperative endeavor of the Revenue Unit of the A.P.S., Plate 5F of the 5¢-Inland Exchange, civil war revenue, was completely replated during the year 1930.

A 17 page illustrated report has been prepared which gives the details of the 170 plate positions and of the many Double Transfers which appear on this plate. The replating charts enable others to reconstruct the plate and determine plate positions by the study of shifts, dots, lines and scratches on the plate.

As soon as the original cost of the report is covered, further additions will be made without charge so as to include the data for the earlier Plate 5.

Copies of this report will be sent on two day approval to serious collectors.

## PLATE RECONSTRUCTION SHEETS for the

15¢ each. <sup>10</sup>8 for \$1.00

## 3¢-1851-57 and other early U.S.

Blank sheets, 10½ X 12½ inches, ruled for a complete pane of 100 (10 X 10) with heading for Plate No., State and Pane, and with positions numbered from 1 to 100. A convenience for the specialist.

Mr. Leo J. Shaughnessy, the 3¢-1851 expert of the Middle West, is preparing a series of these Plate Reconstruction Sheets to show all the plate varieties of the 3¢-1851 by pane positions, one pane to a sheet. The Late State of the first three ~~plates~~ will be diagramed first and if there is sufficient interest they will be made available thru the Shift Hunter Publications at 15¢ each or 8 for \$1.00 in the standard 8½ X 11 size, punched for filing in the Shift Hunter files. The reproductions will be by the Offset Printing Process as usual.

MAT DIAGRAMS for Illustrating and Mounting

1½¢ each plus  
postage.

Plate Varieties.

Diagramatic and Photographic representations of the borders of U.S. stamps, printed in a gray ink on which plate varieties may be illustrated with red or black ink. Center space for mounting stamp. By ruling in a border and trimming to size, these make beautiful display mounts for plate varieties or for valuable stamps in general. Order by number if you wish.
