

Chapter 43

Plate Numbers 33000-33999

Plate number 33000 was assigned to the 11c air mail coil stamp in April, 1971 and plate number 33999 was assigned to the 8c flag coil stamp in January, 1973. The rate of plate number usage slowed and this is a somewhat quiet period. The USPS experimented with sets of commemorative stamps by having four different denominations for both the 1972 Olympics stamps and the 1972 National Parks stamps. The Andreotti press saw increased use and there were more commemorative stamps printed by the gravure method. Collectors did not realize it at the time, but the last special delivery plates were used in this section.

The USPS must have liked the 2c Jefferson coil of the Liberty series because two more plates printed this stamp in this section. These two plates have been found.

The Prominent Americans regular issue had 113 plates assigned with 103 going to press. Two new stamps appeared, the 7c Franklin and the 14c LaGuardia, with four plates each. The 8c Eisenhower sheet stamp had 37 plates to press and it seemed these plates either printed a very adequate number of impressions or a very small number of impressions because some of these plates are tough to locate. The interesting stamp booklet combinations got a new entry with the introduction of the 300 subject plate. This plate was functionally equivalent to the 400 subject plates and the printed panes each contained four stamps and two large labels. Twenty-nine 300 and 400 subject 8c Eisenhower plates went to press and only two, both 400 subject, were reported. These are rare items. The \$1 O'Neill stamp was issued in coil form, the highest denomination coil ever, and two plates went to press. It is surprising, but these plates were found without a lot of difficulty. Seventeen 8c Eisenhower coil plates went to press and two these comprise the two unreported Prominent Americans plates.

The 9 color Huck press spent its time printing the sheet and coil version of the 8c flag stamp. The BEP and USPS reported that 34 plates went to press but collectors have found only 12 of these. The final run must have been very small or non-existent for so many plates to be unreported. The 8c flag coil required 180 plates assigned and 156 were sent to press. None of these 156 plates is available.

Most of the plate number action was in the commemorative arena with 495 plates assigned, 407 to press, and 301 available to collectors. None of these 301 plates is scarce. The gravure method was much more widely used in this section with mixed results. Most collectors seem to prefer the artwork of the engraved designs. An interesting plate number item appears on the 8c Parent Teacher stamp. The lower right position of yellow plate number 33656 is printed in reverse or mirror image.

The air mail plate numbers were more active thanks to two commemorative stamps. The 11c Olympics and the 11c City of Refuge stamps were part of the Olympics and the

National Parks sets. 82 air mail plates were assigned, 64 went to press and 48 are easily available.

Five plates were assigned to the 60c special delivery stamp and four went to press. These four plates were the last special delivery plates in the postage stamp plate number series and perhaps the last of all time. No collector realized at the time that this was the end of special delivery stamps.

The BEP continued printing the 1971 15c aerogramme on the gravure press and 26 plates were assigned. Twenty-four of these were used and three are known to exist because of miscuts and/or foldovers. During the 1970s, it seemed aerogramme miscuts appeared somewhat frequently in auctions. I placed a bid anytime the miscut had a plate number and I was lucky enough to buy three of these gravure plate numbers. So three plates exist on the 15c aerogramme in the 33000 section of plates and obviously these are scarce, or perhaps unique, plate numbers. Plate numbers occasionally appeared on subsequent aerogrammes, but I have not heard of an aerogramme plate number being found in the last 20 years.

Just when you thought there could not possibly be fewer plate numbers available in a section of 1000 numbers, along comes the 33000 section with the 6th consecutive record low of 469 plates. 794 plates went to press and 27 are unreported. But a collector can still locate a high percentage of the available plates.

The special delivery plates are now history and it is time to take a look at the entire special delivery series. How many plates are there to collect and how hard is it? Can this series be completed if one were to try to locate all of the plate numbers of these interesting stamps? We can answer these questions as this gripping drama continues in the next chapter.

Chapter 43-33000
